

GRADUATE PROFILE

SENSE OF SELF INDICATORS

Self awareness

- Examine and strengthen our own identities
- Empathize with and honor the diversity of perspectives & identities in our communication and actions

Purpose

- Explore what matters to us, our vision for our future, and how we use that to impact the world

Values

- Learn and strengthen our own values and make choices aligned to them

COLLEGE READINESS INDICATORS

Academic knowledge and skills

- Master core academic disciplines and engage with rigorous content and learning experiences to prepare us for success in a 4-year college and the 21st century.

College and career ready skills

- Develop the knowledge and skills necessary to establish independence and agency to thrive and succeed in college and career settings
- Self-advocate when faced with obstacles and in support of your values

STEM SKILLS & MINDSETS INDICATORS

STEM content knowledge

- Develop rigorous, specialized STEM knowledge that ensures access to STEM majors and careers
- Gain understanding of the career opportunities in STEM fields

Critical thinking and inquiry

- Synthesize, evaluate, and analyze information and data to identify and solve problems
- Be curious, develop hypotheses, investigate and test solutions to solve problems

Ultimately, we seek to develop graduates to become the best versions of themselves, lead fulfilling lives, and make a contribution to the human story aligned to their chosen purpose.
